All sessions will be held at Largo Community Church. All materials are provided.

Grades 1-3

Primary readers will learn comprehension strategies such as retelling, asking & answering questions, making connections, and identification of the main character and setting. Students will also receive word attack strategies aligned to the Science of Reading which is supported on the 5 pillars of reading. Math instruction will be differentiated by grade level and aligned to PGCPs grade level outcomes.

Grades 4-6

Our certified teachers will explicitly teach reading comprehension strategies and then model the use of the strategy in action. Students will have the opportunity to practice using the strategy on their own or with a partner. Students will learn about the concept of metacognition, or "thinking about thinking." They will understand that reading is thinking. Math instruction will be differentiated by grade level and aligned to PGCPs grade level outcomes.
